POWER BOX AND POWER ADAPTER INSTALLATION INSTRUCTIONS

Installation and mounting may only be carried out by a qualified electrician. Before installation make sure that the power plug is pulled out of the AC socket. **If the power box may be exposed to water, it shall be installed to the wall in the position with cables entering the box underneath.**

1. The “adapter-display” cable shall be connected on the right side of the adapter correspondingly:

- brown – GND (marked on the adapter with -V)
- blue – +5V (marked on the adapter with +V)

2. The “power plug-adapter” cable shall be connected on the left side of the adapter (AC input marked on the adapter with L and N – the connection colours are not important here).
