

1 Download and install the HD player program on your computer from: <https://www.ledtechnology.pl/en/software-and-manuals/>

2 Connect the LED display to the power supply.

3 Launch the previously installed HDplayer.

4 Check whether the LED display is visible as a WiFi device and enter the WiFi key - led12345.

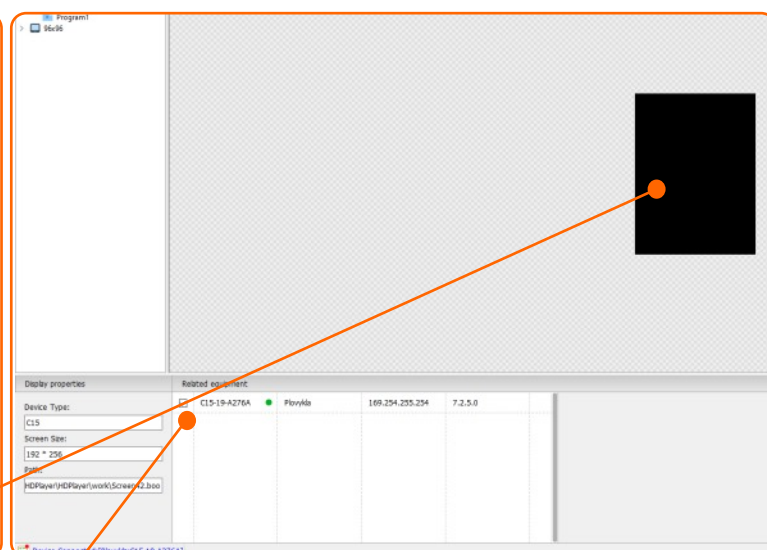

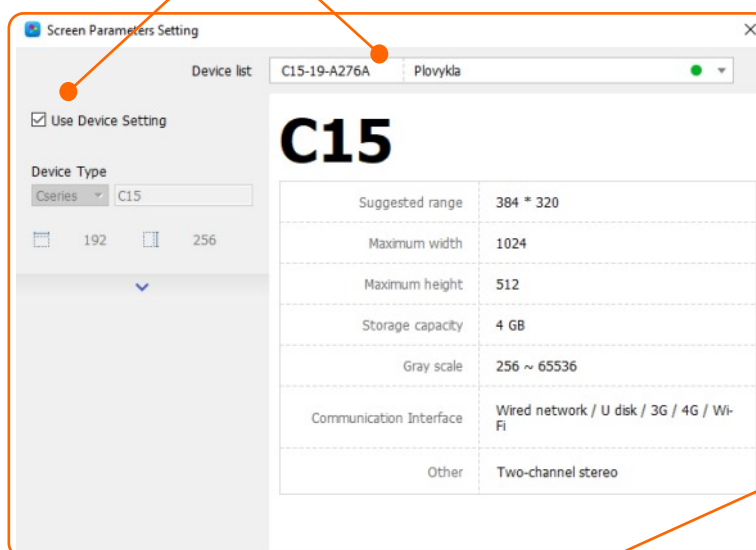

Or if you have a display with LAN, connect the LAN to the computer and go to step 5.

5 In HDplayer select -File-New Project.

6 Select the name of the device in accordance with the name of the WiFi network from point 4 or the name selected and check the "Use Device Settings" box. Confirm by pressing OK.

7 In the opened HDplayer window you can see the currently connected device and the content editing panel. After editing, use the Send button..
